

PRERAK BISEN

📍 Bhopal, India ✉ prerakbisen@gmail.com 🔗 [LinkedIn URL](#) 📁 [Portfolio link](#) 🐙 [GitHub](#)

EDUCATION

Lakshmi Narain College of Technology, Bhopal , <i>B.Tech in Computer Science and Engineering</i> CGPA - 8.39	2023 – Present
Kendriya Vidyalaya Balaghat, M.P. , <i>12th, CBSE</i> 85.8%	2022
Kendriya Vidyalaya Balaghat, M.P. , <i>10th, CBSE</i> 85.2%	2020

TECHNICAL SKILLS

Languages (Java, Python, C++, JavaScript)

Frontend (HTML, CSS, React)

Backend (Spring Boot, Node.js, Express.js)

Databases (MySQL, MongoDB)

Tools & Technologies (Git, GitHub, VsCode, Postman, OpenCV)

Core Concepts (Data Structure and Algorithm, OOPS, DBMS, Operating Systems, Computer Network, REST APIs)

PROJECTS

Hospital Grievance System, *Java, Spring Boot, MySQL, Hibernate JPA, JWT, REST APIs* [\[github|demo\]](#)

- Designed and developed a Hospital Grievance System enabling patients to register complaints, staff members to manage assigned cases, and administrators to oversee the complete grievance resolution workflow.
- Built secure RESTful APIs using Spring Boot, Hibernate JPA, and MySQL for complaint registration, assignment, status tracking, escalation handling, and user management.
- Implemented JWT-based authentication, Role-Based Access Control (RBAC), and email notifications to ensure secure access and transparent grievance handling across Admin, Staff, and Patient modules.

Smart Pickup – AI Based School Pickup System, *OpenCV, React, Node.js, Express.js, MySQL* [\[github|demo\]](#)

- Developed an automated school pickup system using Face Recognition and Automatic Number Plate Recognition (ANPR) to verify parents and identify students in real time.
- Designed a queue management workflow that automatically mapped verified parents to students, generated pickup requests, and updated staff dashboards for organized student handovers.
- Integrated parent notifications, Text-to-Speech announcements, and role-based access controls to improve communication, security, and operational efficiency during school dismissal hours.

FitAI – Fitness Intelligence Platform, *React, Node.js, Express.js, MongoDB, JWT, Groq API* [\[github|demo\]](#)

- Developed a full-stack fitness platform that generates personalized workout plans, diet recommendations, and progress insights based on user goals and health metrics.
- Built secure REST APIs and integrated Groq API powered fitness assistance to provide personalized coaching recommendations, deploying the application using cloud-hosted services.

Edu+ – Smart Classroom Attendance System, *OpenCV, React, Node.js, Express.js, MySQL* [\[github|demo\]](#)

- Developed an automated attendance system using OpenCV-based facial recognition and real-time camera processing to identify students and record attendance.
- Built attendance storage, reporting, and dashboard modules using Node.js and MySQL for classroom attendance monitoring and analytics.

INTERNSHIP EXPERIENCE

Infosys Springboard, *Java Development Intern* 11/2025 – 01/2026

- Developed a Hospital Grievance System using Spring Boot, MySQL, REST APIs, and RBAC during a project-based virtual internship.
- Applied backend development, database design, API integration, and authentication concepts to solve a real-world grievance management problem.

Skillible, *Generative AI & Prompt Engineering Intern* 08/2024 – 09/2024

- Engineered structured prompt templates to optimize LLM output accuracy and reduce token and Optimized LLM response quality and consistency using advanced prompt engineering techniques.

ACHIEVEMENTS & CERTIFICATIONS

Research Paper accepted for presentation and publication at ICIDS 2026.

Winner – Sathathon 2025 Hackathon.

Solved 250+ Data Structures and Algorithms problems across coding platforms.

Cisco Certified – Introduction to Networks (CCNA).

NPTEL Certified – Programming in Java and Data Structures & Algorithms.
